

THE DESTONER

THE WORLDS MOST POPULAR DESTONER!

The DeStoner is the only de-stoner that never damages beans. The beans pass through floating in a bed of air. Stones and other particles remain on the bed after the beans have passed. Just turn it on and let it run. It can process beans up to 1,800 pounds per hour so your roast will pass through in minutes.

- Fluidized separation technology
- 35 Pound hopper
- Runs up to 1,800 pounds per hour
- Stainless steel construction
- Incredibly quiet operation
- Reliable motor
- 110 Single phase
- 220 Single phase optional

**THE DESTONER CAN EVEN
SEPARATE GREEN BEANS
FROM A DARK ROAST!**

**NO DISASSEMBLY REQUIRED
WHEN REMOVING STONES!**

New Hinged Lid. Other de-stoners require disassembly to remove stones.

SIMPLE INSTALLATION.

Many roasters place The DeStoner on an inexpensive wire tale. The beans flow through the wire into a container below. You can also place on the edge of a table and let the beans flow down to a container.

NO ADJUSTMENTS!

RUN MODE

Baffle is in at the correct speed for normal operation and removing green beans from a dark roast.

CLEAN MODE

Baffle open to help remove roasted beans from the screen before removing the stones.
